

yet another attempt by the FCC to step over their boundaries. First, you attack Howard Stern for stuff he has been saying for years with no complaint. Now, you attempt to step on the toes of XM radio. A must subscribe in order to listen to service. A media you should NOT have any rights in regulating. Now, I understand that the services brought into question under NAB's petition 04-160 involves real-time traffic and weather forecasting. I find these services extremely neccessary to be available to XM subscribers. Being that I live in a vastly underpopulated area where the nearest FM signal faintly comes in from 60 miles away, I must rely on the convenient-crystal clear broadcast of my PAID SERVICE of XM radio in order to be aware of what is going on around me. This petition is uncalled for. Please, I urge you to reject this petition and allow XM to continually broadcast their programming in which I pay extra for and therefore believe I deserve.

Thank you for your time.
